

STATEMENT OF PURPOSE

I have completed my Bachelor in Architecture from College of Architecture SVIT, affiliated to Gujarat University, in India. This degree program has given me a thorough foundation of skills and understanding. In academics, my studios were all part of the end year exhibitions. My thesis has won the Gold Medal and has scored highest among all of the colleges affiliated to Gujarat University. I have won 2 National, 1 State and 2 intercollege competitions. I also have won the competition involving Architectural Journalism at national level. My housing studio was placed in Top 15 in Asia by ACARA (Asian contest for architectural rookie's award) 2018 of AUA (Asian united architecture association). My work has been published in the college magazine and the thesis is published in an architectural magazine named Continuum.

Apart from academics, I was a cadet for 2 years in the National Cadet Corps, in the Air force wing, of my nation, which has taught me discipline and timekeeping. I am also volunteering at a city orphanage, for the kids between the ages of 4 to 8 years. I also design low-cost huts for the homeless people in my city using the knowledge I gain in architecture. In my free time I have also taken up jobs of watch repairing, cashier, sales representative, dog rescuer and arranging picnics for orphans.

I joined INI Design Studios at Ahmedabad, one of the India's best design Studios. This experience broadened my vision than before. As an architect, I have worked on various types of architecture such as redevelopment, commercial, corporate, institutional, industrial and religious & spiritual buildings. I have worked in prestigious Indian projects like Multi Modal Transport Hub at Ahmedabad and Master Planning of Kedarnath city, approved and inaugurated by the Prime Minister of India. I also am efficient in presentation tasks and project approval procedures from various govt. departments.

My work this far has been very worthwhile and encouraging. It has made me comprehend about project feasibility and my short-comings. It has also made me attentive on the extents in which I need to improve. I now feel that it's time to stretch my perception. Longing to learn more, I have decided to get enrolled in a master's degree program in Architecture. I believe that I require myself to get exposed to a globally acclaimed education structure in a multicultural environment, to gain competitive advantage. The UK has always been known and acknowledged for its internationally recognized curriculums and qualifications. Therefore, I wish to pursue my Master's degree in the UK.

After extensive research on the internet, I have decided to obtain admission in Architectural Design(international) at University of Strathclyde Glasgow. University of

Strathclyde is second oldest university in the UK. Also, it's first technological university in the UK. University of Strathclyde Glasgow is ranked university in the top five universities in the UK especially for its research efforts. University of Strathclyde Glasgow has have been awarded by many higher education. University of Strathclyde Glasgow provides many facilities such as theaters, museums, cuisine, clubs, second-hand shop and boutiques, gym, sports, huge library, computing provisions, and student service center. University of Strathclyde Glasgow provides wind range of courses. One of the best parts of this university is that students unions and its best place to create bond with new people, know about new culture, and many other interesting things. Apart from this, the website of the university is the most informative. International societies under one roof, being present in a university is important to me. I was able to gain more information of which I was in need of.

As I choose Architectural Design (international) because with this particular course I will explore the full range of skills such as design skills and knowledge, get deep knowledge of building and construction, thinking and reasoning skills, customer service skills, verbal communication skills, analytical thinking skills and many other which will help a lot in my future. Secondly, it is a very creative profession, and fact thing is that I can design those things which I released in real life. Apart from this, I can solve many problems though the design. My previous qualification and experiences have shaped my understanding of this field of study and I am quite confident that that given a chance to be part of such a prestigious university I will be a dynamic and productive addition.

Your master's program is ideal for meeting my educational goal. As, its modules are a perfect match to what I look forward to learning. The contemporary facilities in the campuses, honored professors and their unmatched teaching methods and guidance, will unquestionably provide me a pioneering education that will prepare me for future challenges and opportunities.

I am determined to pursue this program because I am able and passionate about it, and I will discover more of the inner joy when I complete it successfully. Upon the completion of this program, I will thrive on gaining international experience, before I return back to my own country, to apply all my ability enriched with high standards of the international knowledge and market, within my own country. That is my ultimate purpose. To apply my knowledge to help my developing country. I am confident that my efforts will definitely bring the difference and change the way of living, with the help of Business management .
