

My name is **Student Name**, I am an indian student completed my entire education india. I have completed secondary school in 2007 with 73.38 % and higher secondary school in 2009 with 61.00% from GSHSEB. After that I also completed bachelor of engineering – Electronics & Communication Engineer in 2013 with 6.66 CGPA from Gujarat Technological University. I have gained knowledge and academic experience in Electronics engineering. I also have worked with AMOLI ORGANICS PVT. LTD,INDIA from june 2015 to march 2020 as an Officer In engineering and projects department where I developed projects and management skills. I am currently working with Alembic as an executive in instrumentation centre. Hence I now want to add some extra skills can open up with further options for further opportunities. During my research I got to know about important of international degree for further opportunities. I researched for better course options with various universities in the UK and I finally got an option upon eligibility criteria and my area of interest. I want to apply for **Smart Telecom and Sensing Networks (SMARTNET) MSc – 1 year**. I also have appeared for Duolingo English Test in April 2021, I achieved 105 scores in it as I was preparing myself for international education.

UK is the best country for studying further because the standard of education in UK is one of the best in the world. The programmes taught in the UK promote critical and innovative thinking that would help build crucial skills for an individual's future prospects. UK is recognized for its pragmatic, professional introduction and by the open structural planning of the course plan. UK offers renowned programmes in my field of study. It is a highly developed and technically advance country, with a great multicultural atmosphere that is conducive for international students.

Students are made to feel welcome, which makes it easy for them to integrate into the cultural fabric of the country. A degree from a UK university would help me stand out as a candidate in my home country. Hence after an optimum research, I felt United Kingdom as the most ideal alternative for my advanced education and accurate as far as span obviously, climatic appropriateness and furthermore conservative as compared to different nations. Indeed, even wrongdoing and political turmoil is uncommon in United Kingdom.

I would have many options in the UK for same course but I found **Aston University** the best for certain reasons. It is gold rated for Teaching excellence framework and also well ranked university, it has ranked 43rd in university league table 2021. Studying at Aston university is a big advantage for international students as it has quality of research, teaching, learning and development and it will also help me to improve my knowledge in my field and help me style myself into a better person. I am very impressed with the standard facilities available at this University and the experience they provide to students as per the field. Employability is also embedded into this course at this university; it will help me to develop transferable and personal skills.

I want to pursue MSc **Smart Telecom and Sensing Networks (SMARTNET) MSc - 1 year** at your university. Because I was always always dreaming to study such a demanding course, it includes wireless network, sensing networks, and 5G technologies and photonics networks. The course builds up with the innovative and most demanding skills. The range of my study subject is relevant to both society and industry. With this course I'll gain solid skills to have my role in operation, design and telecommunication systems. On the completion of this course I could work

as a telecommunication engineer with telecom industry, Telecom network I & C Service, Telecom Engineering services and Telecom networking.

The role of telecommunication engineer is welcomed everywhere in the world as every industries are developing up with the latest technological world. Telecom engineer are required in diverse field such as radio, television, satellite, optical fibre and internet. All the activities related to this requires a telecom engineer so it make me very clear that this field has good and unending career prospects. Hence the chosen course is excellent choice for me upon my area of interest, previous education and future career growth.

After the completion of this degree, I am planning to return back to my native country where I can work as a telecommunication engineer. The practical experience that I would gain during the program would certainly increase employment opportunities for me in my home country. I believe that I would become a desirable candidate for employers in India, since this degree would set me apart from other candidates in India. If I get an opportunity to study at your university in UK, I would get the platform where I would get one step closer towards my dream and become successful in my life. I aim to put as much as I could into the course and I very much hope that you will look favourably upon my application. Thank you for your time.
