

Statement of Purpose

My name is **Student Name**. I am interested in pursuing the BSc (Hons) Information Technology with Foundation Year at the London South Bank University. I have recently completed my Higher Secondary Education in March, 2018. I have interest in technology, Programming, Computer Languages like PHP, CSS, Java, Python , cyber security, data science, computer networking and many others computer related subject that's why I want to pursue my degree in Information Technology.. With this course, I would like to learn about theory of computation, fundamentals of Information technology , compilers and operating systems, information theory, basic programming, systems and architecture, software development and testing, web applications and databases, algorithms and many others interesting modules which will help me in this IT sector. I have always wanted to have a career in the area of Information Technology. Careers in IT are highly sought after due to its demand for many businesses around the world.

The reason why I decided to go forward with this course is because it would help me become a competent and skilled expert. It will also help me gain practical and professional understanding of a variety of ethical and field related issues. Information Technology is a rapidly growing field and after acquiring solid technical skills in the BSc program, I would be ready for a successful career in the field. The program offered at the University of West London promotes logical skills and critical thinking, both of which would help me become a capable professional who can find quick and effective solutions for the organization that I work in. Modules such as computer systems, programming and information systems and databases would be beneficial for me since it would guide me towards the path to becoming a good software developer. The teaching staffs have a wide range of qualifications and are very skilled in their respective subjects. All these factors have prompted me to go forward with this program at your university.

London South Bank University is a public university in Elephant and Castle, London. It has achieved its university status in 1992. The Guardian's 2018 league table of teaching excellence ranked the university 92 out of 121 British institutions. The Sunday Times' league table, measuring a number of different factors including teaching quality, research quality and employment rates, ranks the university 120th. Apart From this, LSBU has made significant progress in relation to student satisfaction and teaching quality, which, for the first time, has taken the University into the top 100 places overall. These results show that LSBU continues to challenge the most prestigious institutions on the salaries secured by our graduates. In addition, London South Bank University have strong academic background and also have impressive staff with strong education, depth knowledge, well experience and experts. London South Bank University have first-class facilities such as laboratories, workshop, media centre, library, Learning resource centre, applicable technology, experience supporters and many others.

UK is known for its exceptional teaching standards that stretch beyond classroom learning. The universities offer a wide range of courses and specializations that fit well with a student's

educational profile. The universities have a global ranking that ensure the acceptability of a student's qualifications, anywhere in the world. UK is a country that accepts students from all across the world, a fact that is the reason for its multicultural atmosphere. Students are made to feel welcome, which makes it easy for them to integrate into the cultural fabric of the country. The courses in the universities of UK provide flexibility and are perfectly suited to transform one into a confident expert in whichever field one would partake in. The prospect of getting to experience a renowned education system in this country is something that I really look forward to.

After completing my course I am confident that I will get a suitable job as a Software developer, hardware engineer, and Data scientist, IT specialist, networking engineer, system engineer, system designer, web developer and many others in a reputed IT company in India. A degree from your university would help me not only develop my practical skills but will also help me develop my personality. I look forward to pursuing this course at your university.

Thank you.
