

My name is **Student Name**. I am a hard-working student. I always look forward in the life. I am an optimistic person and always think that How to make a bright future. I always analyse pros and cons of situations / project so as to make the way clear. I listen very carefully everyone to take good out of them. I know everyone has something special / different quality in them, so I respect everyone. I feel that management taught me how to work better in worst situations. I think every perspective has two faces, in which one is IN and other is OUT, so I always try to work rather to hesitate.

I am working as a Test Engineer in Sathya Software Solutions. My activities includes testing the software and writing the debugging reports.

Characteristics- I enjoy my personal satisfaction, financial gain, and stability in my work. I take my every work seriously and complete it with full concentration. I plan steps timely in my work / project. I analyse the problem and try to found exact problem and then give my full efforts to solve it.

Skills- In this corporate world, Communication is the way to reach in-depth of anyone, to become introduce, to get knowledge of someone. This is the way to address formally and transform information to other.

I was born in Hyderabad, the capital city of Andhra Pradesh, India. My native language is Telugu but I am fluent in Hindi (Indian National Language) and English as well.

I enjoy playing the guitar, reading, and learning about business. I was member of the high school's Cricket team. When I am not studying of playing sports, I spend my time lifting weights at the gym.

While I am in college, I intend to spend my time improving myself academically and socially, even as I learn to be independent and responsible about my life. Above all, I want to be able to develop my ability to become an important person who can make a change in the world as an international-business professional. Although I expect to gain a lot as a university student, I also want to be a positive contributor the school campus. I am willing to get involved with activities that promote the efficient running of the school. I want to share my unique background, culture, traditions, and experiences with other

students and promote activities that contribute to the progress of the university. I am a very honest person, I have a lot of respect for the other, and I hope to inspire the same values in the new people that I will meet.

Today U.K. is the largest economy of the world and it is also known for the hub of higher studies. UK is one of the most exciting country in whole world. UK has created a good reputation in the world of education. It is a place where people live and work together. U.K. is an educational country with many universities, colleges, schools and other institutions of learning. Living and studying in UK can be very rewarding and it will put me at the center of great social, cultural and educational opportunities. It is a best place for making a bright future. A vast mixture of forward-looking courses and exciting experiences and valuable qualifications can really make us different from others. Here we will get variety of courses and places to study, and help to prepare ourselves to guide us in a really fantastic learning experience. A major advantage of studying in the UK is, the opportunity to become perfect in foreign languages. It is also an educational country with many universities, colleges, schools and other institutions of learning. This great country caters for a wide variety of different tastes, styles, fashions, cultures and communities, and offers an enormous range of sights and historical buildings which are some of the most enjoyable things to visit and experience. London is a place where students should feel lucky if they will purse the management degree. In U.K. they will get enough opportunities to learn in a good educational and professional background. For studying abroad I select London (UK) on basis of various factors like standard of living of the people in the country, the quality of education, the educational history of a country, peaceful and studious environment, fees structure, course structure, worldwide recognized Degree, clean and secure environment.

I have a great desire to study Business Administration and get Master degree in Business Administration at Anglia Ruskin University.
