

Statement of Purpose

Hello! As a prospective student interested in studying Civil engineering Structures, I'm thrilled to present myself. My name is **Student Name** and I've always found the process of creating structures like bridges and buildings to be fascinating. I have always been interested in maths and science, and I want to solve problems. I have completed my Bachelors of Civil Engineering from Gujarat Technological University with 6.37 CGPA in 2019. After completing bachelors, I worked with two firms named CBM and Utpal Padmakant Shah Engineers and Contractors where I am currently working as a Site engineer since November 2020. Throughout my academic career, I have demonstrated a keen interest in applying scientific principles to solve real-world problems, and I am confident that studying further in Civil engineering Structures will allow me to continue pursuing this passion.

The **UK** is home to a sizable number of top-tier institutions and colleges. An UK degree is well-accepted worldwide because to its clear framework of recognized credentials and reputation for good teaching and research. The UK provides a broad range of courses across all academic disciplines and is well-known for its high standards in education, effective learning techniques, short course lengths, open learning environments, and student-teacher collaborative learning. The information acquired at UK universities gives its students practical skills that help them develop their whole identities. Furthermore, I would be able to acquire excellent information to raise my level of thinking thanks to the skilled faculty members that are leaders in their profession. The UK is renowned for offering top-notch education in a variety of subject areas. It is the location of several highly regarded universities that award internationally recognized degrees. Due to the fact that it is a popular choice for many international students from across the world, the UK is a particularly cosmopolitan nation. The institutions include programmes that encourage original and creative thinking, preparing students for employment following graduation. It is perfect for students who want to return home because a degree from the UK is recognized all around the world. Both the quality of student life and the range of resources available to them in the UK are unparalleled.

A vital role in the planning, development, and upkeep of infrastructure worldwide is played by the intriguing and gratifying subject of **Civil engineering Structures**. Studying Civil engineering Structures in the UK is a special chance to pick the brains of some of the most knowledgeable professionals in the industry and to acquire practical experience on actual

projects. The excellent calibre of instruction provided by the institutions in the nation is one of the main benefits of studying Civil engineering Structures there. Engineering education in the UK has a long and illustrious history of quality, and its institutions are famous for their demanding academic curricula and cutting-edge research. It allows for a great deal of creativity in the design process, as engineers must consider not only the structural integrity of the building but also its aesthetic appeal. This blend of technical and creative skills can be both challenging and rewarding. Civil engineering Structures is a field that directly impacts people's lives, as the structures that engineers design and build are essential to modern society's functioning. By studying Civil engineering Structures, you have the opportunity to make a meaningful contribution to society by designing safe and efficient structures that improve people's lives. The modules of this programme included information about Structural Reliability, Finite Element Methods, Dynamics of structure, Design of steel and composite structures and so on that will definitely enhance my understanding at huge extent.

City, University of London is well-known for its Quality Education. It is consistently ranked among the top universities in the UK and the world, with a reputation for excellence in research and teaching. In the 2022 Times Higher Education World University Rankings, City is ranked in the top 350 universities in the world, and is ranked 34th in the UK. In addition, City has been awarded a Silver rating in the UK government's Teaching Excellence Framework. Also it has strong links with industry and business, and is located in the heart of London's financial district, which provides students with many opportunities to network and gain real-world experience. Many of the university's programs offer internships or placements with leading companies, which can be an invaluable experience for students looking to build their careers. Moreover it is situated in the heart of London, providing students with easy access to the city's vibrant cultural and social scene. This can be an excellent advantage for students looking to build their professional network and gain work experience while studying.

Within a year after finishing this programme, I intend to return to India and use the knowledge I have gained there for the country's benefit. I anticipate having a very successful career that I can be proud of. I think I've advanced steadily yet quickly in the engineering profession in the past, and I'm keen to do the same in your Civil engineering Structures programme. After that, I'll start working for any global corporation in my hometown that offers a good work position as a Project Manager or a Senior Structural Engineer. I appreciate your thoughts and time.

Regards,
