### **LETTER OF RECOMMENDATION**

It is a pleasure to recommend **Student Name** for a master's program at your university of repute. I have known her since 2013 as a student of M.Tech (Int.) in the biotechnology department of this institute. She has been sincere and dedicated during the entire course of her studies, as demonstrated by her CGPA of 8.76. During her coursework, she showed immense interest in subjects such as molecular biology, genetics, molecular modeling, bioinformatics, microbiology and immunology. She consistently achieved good grades and was capable of skillfully applying her theoretical knowledge to accomplish experiments.

She was able to gel well with her classmates and was co-operative and helpful to everyone. Her participation in poster and oral presentations had been enthusiastic. She is a passionate person who is inspired to chase enormous ambitions through her earnest efforts. **Diksha** primarily stands out because of her receptiveness, thoughtfulness, and keenness to discover novel ideas. I have taught her courses in bio safety, bioethics, intellectual property rights, and quality control management in biopharmaceuticals. Also, I have monitored her during in-house summer training. She has impressed me with her performance and insistence on continually working towards surpassing her own feats. In addition to studies, she had been involved in diverse extracurricular activities such as dancing, debates, and street plays. I can confidently say that she had perfectly balanced her academics with other activities.

She had successfully completed her one year research project/ dissertation entitled "Detection of Memantine hydrochloride for induction of Phospholipidosis in vitro and in vivo" at Sai Life Sciences Ltd., Pune, India. She successfully completed her M.Tech (Int) Biotechnology in the year 2018.

On a personal level, I found her to be disciplined with a positive and lively personality. She can train and guide her juniors well and makes a good team member. She also possessed good communication skills in reading, writing and speaking in English. I adjudicated her exams as well and can attest that she expresses her thoughts very precisely.

I strongly recommend her for a masters program at your prestigious university with full financial aid. I feel that appropriate mentoring from technical stalwarts can work wonders for her professional growth and success.

I wish the best for her future endeavors and hope to see her surpass all expectations professionally.

**LETTER OF RECOMMENDATION FOR MS. DIKSHA VASAVA**

It is with great pleasure that I recommend Ms. Diksha Vasava for admission for a Master's degree program at your esteemed University. She has completed her M. Tech. (Integrated) Biotechnology course at our institute. I mentored Ms. Diksha during her studies and have taught her subjects like Plant Tissue Culture, Agriculture Biotechnology and Molecular Biology. These opportunities helped me to judge her scientific ability, both in the context of her theoretical understanding of the subject and hands-on practical approaches to science.

Considering the subject theory classes, Diksha has always been punctual and attentive in the class and has impressed me with questions on the topics being taught in the class. In particular, her ability to understand and ask fundamental questions on the topic has impressed me very much. I also observed her eagerness to carry out all the laboratory work independently and apply what she learned in the theory classes. Diksha's practical assignments were performed accurately, revealing her strong understanding of the subject and her ability to effectively implement her conceptual knowledge. She needed very little guidance in designing the whole experiment. She is a well-organized student with very good communication skills.

She will successfully take up the challenges of a master's degree. She is a dedicated student and a competent professional. I strongly recommend Diksha Vasava's application for the Master's degree program at your esteemed university and wish her all the best.
